

# P-DUKE Technology Co., Ltd.

Founded in 1992, P-DUKE 100% concentrates on the research, development, production, sales and service of DC/DC Converters and AC/DC Power Supplies. With products sold under our own brand name, P-DUKE to worldwide countries, we accumulate great skills through years of experience and open up better product awareness which leads to further cooperation with world-famous companies, making P-DUKE an important role in the global market. With factories in Taiwan and China, more than 400 employees, and a solid capitalization, P-DUKE Technology Co., Ltd. is now a name to be reckoned with.

### ► DC/DC Converters

Non-isolated: POL

Isolated:

- SMD Type
- Brick Type
- SIP Type
- Wall Mount Type
- DIP Type
- Din-rail Type

### ► AC/DC Power Supplies

- Open Type
- Din-rail Type
- Enclosed Type
- Encapsulated Type
- U Chassis Type

### ► Customized products

No Pass: Quality Control – Innovation; Improvement; Excellence

As one of the leading companies in power supply industry, to maintain the excellent quality of our products and to fulfill the commitments toward customers, P-DUKE executes the quality policy of "All as QC", which aims at improving competitive advantage and customer satisfaction.

P-DUKE all products certify to the international safety standards, including UL/CUL safety approvals, CB report, and CE safety requirement.

Our production is performed under strict quality control procedure which conforms to ISO-9001 standards; incoming components inspection is based on MIL-STD-105E; our all products conform to Metal Conflict-free, RoHS2.0 and REACH.

We also manufacture products for a wide variety of different field applications that are qualified to medical 60601-1, railway EN50155 and EN45545-2 or I.T. 60950-1/62368-1 standard.

Furthermore, to ensure product quality and reliability, we implement 100% inspection before shipments.

## P-DUKE Growth Since 1992
